Risk and Reward Profile

What does this indicator mean and what are the limits?

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.

Why is the Fund in this specify category?

This Fund is in category 6, since the share price has a high volatility, therefore the risk of loss as well as the expected reward can be high.

Material risks not adequately captured by the risk auditor include:

- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The Fund can invest a material part of its assets in bonds. Their issuers can become insolvent, thus their bonds can either partly or entirely diminish in value.
- Liquidity Risk: The Fund may invest a material part of its assets in other funds. With these funds there can be a risk of suspension of redemption and therefore their liquidity can be constrained.
- Stock Connect risk: The Fund may be investing in China A-Shares via the Shanghai/Shen Zhen-Hong Kong Stock Connect which may entail additional clearing and settlement, regulatory, operational and counterparty risks.
