3 Summary of significant accounting policies (continued)

The value of the assets of each sub-fund shall be determined as follows:

- The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid
 expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed
 to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which
 case the value thereof shall be arrived at after making such discount as the Company may consider appropriate
 in such case to reflect the true value thereof.
- 2. The value of securities, financial derivative instruments and assets will be determined on the basis of the closing or last available price on the stock exchange or any other Regulated Market as aforesaid on which these securities or assets are traded or admitted for trading.
- 3. If a security is not traded or admitted on any official stock exchange or any Regulated Market, or in the case of securities so traded or admitted the last available price of which does not reflect their true value, the Directors are required to proceed on the basis of their expected sales price, which shall be valued with prudence and in good faith.
- 4. The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative. The reference to fair value shall be understood as a reference to the amount for which an asset could be exchanged, or a liability be settled, between knowledgeable, willing parties in an arm's length transaction. The reference to reliable and verifiable valuation shall be understood as a reference to a valuation, which does not rely only on market quotations of the counterparty and which fulfils the following criteria:
 - The basis of the valuation is either a reliable up-to-market value of the instrument, or, if such value is not available, a pricing model using an adequate recognised methodology.
 - Verification of the valuation is carried out by one of the following:
 - an appropriate third party which is independent from the counterparty of the OTC derivative, at an adequate frequency and in such a way that the Company is able to check it;
 - a unit within the Company which is independent from the department in charge of managing the assets and which is adequately equipped for such purpose.
- 5. Units or shares in undertakings for collective investments shall be valued on the basis of their last available net asset value as reported by such undertakings.
- 6. Liquid assets and money market instruments may be valued at nominal value plus any accrued interest or on an amortised cost basis. All other assets, where practice allows, may be valued in the same manner.
- 7. If any of the aforesaid valuation principles do not reflect the valuation method commonly used in specific markets or if any such valuation principles do not seem accurate for the purpose of determining the value of the Company's assets, the Directors may fix different valuation principles in good faith and in accordance with generally accepted valuation principles and procedures.
- 8. Any assets or liabilities in currencies other than USD (the "Reference Currency") of the sub-funds will be converted using the relevant spot rate quoted by a bank or other recognised financial institution.

The cost of securities is the weighted average cost of all the purchases of these securities. For securities that are priced in a currency other than the Company's currency, the average cost is calculated with the exchange rate of the purchase date.

Remuneration policies and practices

The Management Company has established and applies a remuneration policy and practices that are consistent with, and promote, sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profiles, rules, the Prospectus or the Articles of Incorporation nor impair compliance with the Management Company's obligation to act in the best interest of the SICAV ("the Remuneration Policy").

The Remuneration Policy includes fixed and variable components of salaries and applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers whose professional activities have a material impact on the risk profiles of the Management Company, the SICAV or the Sub-Funds. - a) the staff engaged in control functions are compensated in accordance with the achievement of the objectives linked to their functions, independently of the performance of the business areas that they control;
- b) the fixed and variable components of total remuneration are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component;
- c) the measurement of performance used to calculate variable remuneration components or pools of variable remuneration components includes a comprehensive adjustment mechanism to integrate all relevant types of current and future risks.
